

Take-back scheme

Checkit is committed to recycling its equipment, wherever possible, and where this is not possible, to the safe disposal of our equipment.

Equipment **(marked with the symbol shown below in red)** must not be disposed of with household or municipal waste. In order to recycle the equipment, you can take the product to an electronics recycling centre.

Alternatively, Checkit offers a take-back scheme for all its equipment (including any batteries used in our equipment). If you would like Checkit to arrange the return of any equipment supplied by Checkit over the course of your contract with us, please email stores@checkit.net with the subjectline **'Take-back request'**. In the email, please set out what equipment you wish to return, along with a description of the corresponding site. Additionally, please provide us with the details **(Quote Number / Contract Number)** of your contract with Checkit.
