Focus
Resident wellness & nutrition

Challenge
Food safety & compliance

Senior Living Dining & Compliance Environment

Morningstar Senior Living operates over 40 communities nationwide, serving tailored nutritional experiences daily. With rising regulatory demands, diverse dietary needs, and a mission to elevate resident wellness, maintaining consistent food safety and compliance was critical — yet traditional paper-based processes were straining staff, slowing reporting, and limiting visibility into key food safety and asset performance metrics.

⚠ Operational Challenge

Manual Methods Unable to Scale

Paper-Based Processes
Culinary and dining teams relied on

Limited Visibility
Leadership lacked real-time insight

Staff Burden
Culinary teams juggled service

manual logs for food temperature checks, equipment compliance, and sanitation records — leading to time lost on administrative tasks and potential data errors.

into food safety checks, equipment deviations (e.g., refrigeration temps) or compliance status across all 41 locations.

delivery with compliance documentation, often duplicating work and delaying corrective actions.

Why Traditional Methods Failed

- **Inconsistent Documentation** — prone to gaps, delays, and loss
- **Reactive, not proactive** — issues discovered after the fact
- Audit readiness **difficult** to maintain
- **Scattered accountability** — manual tracking error-prone

🌡 The Solution

Checkit Platform + Asset Intelligence, Sensors & Mobile App

Morningstar implemented Checkit's digital compliance platform across 41 locations, integrating:

🌡 **Asset Intelligence & Sensors**

Continuous monitoring of critical kitchen and storage assets (walk-ins, coolers, hot holding) for automated temperature & environmental tracking.

📱 **Mobile App for Food Probing**

Culinary staff use the Checkit app to perform digital food temperature checks, capture results instantly, and link data to compliance records.
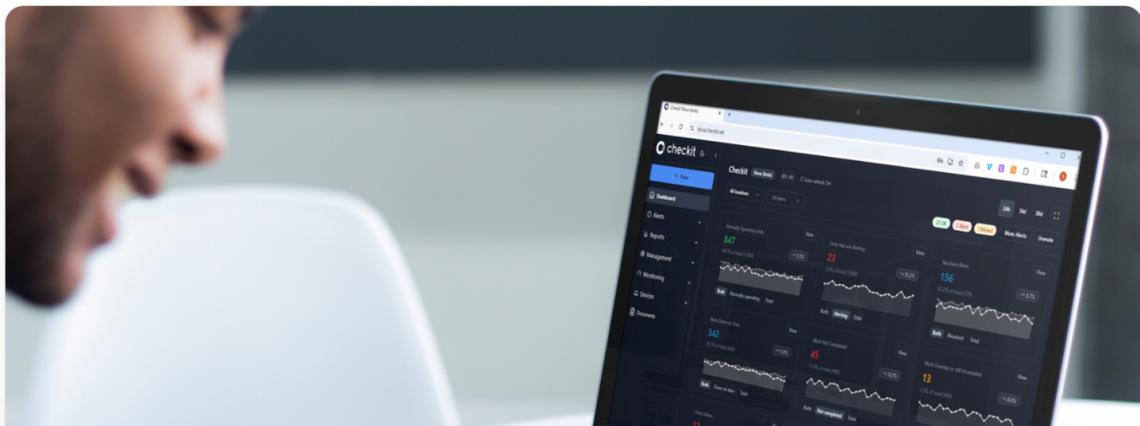

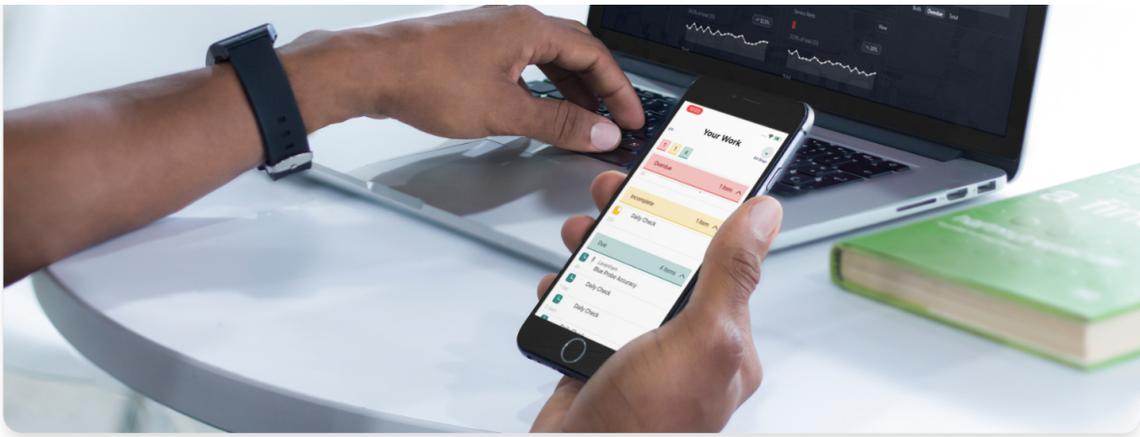

☁ **Cloud Dashboard & Reporting**

Centralized view of compliance results, overdue tasks, sensor alerts, and audit reports—accessible to culinary leadership.

🔔 **Real-Time Alerts**

Instant notifications for deviations allow immediate corrective action, preventing food safety risks.

> "Checkit has transformed how we approach food safety across all our communities. Our teams now spend **less time on paperwork** and **more time with residents**. The real-time visibility gives me confidence that we're delivering **consistent, safe dining experiences** every single day."

Natalie Brown
VP of Culinary, Morningstar Senior Living

Benefits

Better Data, Better Action

Accurate, Audit-Ready Records
Digital logs replaced paper charts, eliminating transcription delays and errors.

Operational Efficiency
Staff spend less time on manual documentation and more on food quality and resident engagement.

Real-Time Compliance
Automated checks and alerts ensure consistent adherence to food safety protocols across communities.

Improved Visibility
Culinary leadership gains centralized insights into compliance status and trends.

Outcomes

Metric	Result
Compliance Accuracy	Significant improvement with automated logging
Time Spent on Admin Tasks	Reduced by a material percentage
Real-Time Issues Identified	Faster corrective action vs paper logs
Staff Confidence	Higher due to reliable process and data

> "Morningstar exemplifies what's possible when senior living operators commit to **digitizing compliance**. Their leadership recognized that resident wellness starts with **excellence at the technology level**— and that paper-based processes simply can't deliver the consistency and visibility required at scale. We're proud to support their mission across **41 communities** with more to come."

Kit Kyte
CEO, Checkit

What's Next

Ongoing UI & Workflow Optimization

Morningstar is collaborating with Checkit's team to evaluate next-generation interfaces and enhanced compliance workflows. This includes:

Intuitive Platform UI
More user-friendly interface design

Broader Operational Checks
Beyond food safety to sanitation procedures

Cross-Location Benchmarking
Performance comparison across communities

Enhanced Compliance Workflows
Streamlined processes for regulatory requirements
